

Wendy Areli Ramírez Burgos

Neuropsychologist (UNAM) · Change Management & AI Adoption at Scale · Instructional Design · Behavioral Data & Analytics

Mexico City · Open to relocation and remote work · warb91030@gmail.com · LinkedIn: linkedin.com/in/wendyRB-ai · ORCID: 0000-0001-9261-4859

PROFESSIONAL PROFILE

Clinical neuropsychologist with over 10 years of experience designing, implementing, and measuring training programs, technology adoption, and behavior change. My most recent role was as Public Policy and Educational Programs Representative in Mexico for OpenAI, where I led AI adoption programs for more than 3,000 participants across government, higher education, the legislature, and the productive sector, with direct engagement with national-level decision-makers.

I combine three capabilities that rarely coexist in one profile: a clinical understanding of how people learn and change, execution of nationwide programs with multiple stakeholders, and methodological rigor in data (peer-reviewed publications, data architecture and governance in population research). I build communities, design learning experiences, synthesize complex information into decks, pitches, and executive documents, and make evidence-based decisions.

AREAS OF EXPERTISE

Change Management & AI adoption: adoption strategy design, AI literacy, change management (ADKAR methodology training), reducing cognitive and technological barriers, enablement, technology governance

Stakeholder & institutional relations: stakeholder mapping, policy briefs, multisector coordination, interinstitutional collaboration, partnerships with government, academia, and industry

Instructional design & training: curriculum design, instructional scripts, LMS, teacher training, gamification, microlearning, hybrid and in-territory education, popular education, workshop facilitation

Strategic communication: executive decks, pitches, presentations to authorities, storytelling, outreach materials, multimedia content, SEO, microsites, communication for non-technical audiences

Data & research: methodological design, surveys with complex sampling design, variable architecture, data quality control, indicator and KPI analysis, clinical research, scientific publications

Community & leadership: community building, ambassador programs, mentoring, facilitating diverse groups, work with women and girls in STEM

Product & HealthTech: early-stage product strategy, intended use and functional scope definition, institutional adoption, human-in-the-loop AI, regulatory mapping for software as a medical device

Marketing & education growth: email marketing, participant acquisition and conversion, automation, database segmentation, funnel analysis

PROFESSIONAL EXPERIENCE

Public Policy & Educational Programs Representative (Mexico)

Jul 2025 – Feb 2026

OpenAI (via Aurora Policy Solutions)

- Led national AI adoption programs reaching over 3,000 participants across 8+ institutional sectors, in in-person, hybrid, and virtual formats.
- Designed and facilitated programs for: the Nuevo León state government (650 participants), the Ministry of Tourism – SECTUR (650: service providers, students, and officials), basic-education teachers in Yucatán (~500), senators and deputies (250), DGCyVE and COSAC (200), and small-business and entrepreneurship cohorts (200 per cohort).
- Collaborated with the Undersecretariat of Higher Education and TecNM on faculty and engineering-student training; designed courses applying the CONOCER EC0301, EC1585, and EC0366 standards, validated by those institutions.
- Mapped key stakeholders and produced policy briefs; maintained direct engagement with decision-makers at SEP, TecNM, and Media Superior (upper-secondary education).
- Designed a teacher-training program aligned with the Nueva Escuela Mexicana framework, for preschool-through-middle-school teachers.
- Delivered a specialized workshop at Universidad Iberoamericana on generative AI adoption in the field of Law.
- Produced executive decks, strategic presentations, reports, and summary materials for sessions with authorities, translating AI, technology governance, and sustainability into clear language for non-technical audiences.
- Adapted each initiative to the audience's professional context, technical level, and cognitive profile to reduce adoption barriers.

Co-founder — Product Lead & Policy Lead

2026 – Present

SISAP Recover AI · Clinical decision-support system (CDSS) for substance use disorders

- Define intended use, user, environment, and product scope (Gate 1) ahead of architecture decisions; translate clinical stakeholders' needs into software requirements for a human-in-the-loop system, not automated diagnosis.
- Lead the preliminary regulatory strategy (COFEPRIS, IMDRF, IEC 62304, ISO 14971) and maintain the product's regulatory profile and risk matrix.
- Map ecosystem stakeholders (private therapeutic communities, CECAJ, CIJ, CESMA), lead the interview pipeline and the business model.
- Built the institutional-adoption dashboard (15 modules) integrating context, stakeholders, regulatory risks, competition, business model, and traceability; maintain the traceability matrix with epistemic labeling (fact / hypothesis / inference / pending).
- Selected for the Jalisco MedTech 2026 accelerator (SICyT / CIATEJ / inMateriis); liaise with program mentors; co-author of a team poster at the XI National Congress of Psychology Research (UdeG, 2026).
- The technical model (MFR Autoencoder, under peer review at Springer/ICAIMH 2026) was developed by the project's technical team; my role translates it into product, strategy, and institutional adoption.

Research Data Architect — Exposome & Cognition Project (ICE-ENDES)

2026 – Present

Neuroscience and Mental Health Research Group, Universidad Científica del Sur

- Design the data architecture for an epidemiological study on exposome and cognitive alterations: source integration, variable harmonization across editions, and bases structured by observation level under a complex survey design.
- Establish data quality, traceability, and integrity controls, and produce the onboarding guide so the team uses the base with consistent criteria.
- Under a confidentiality agreement with the research team, I don't publish the study's data, figures, or results.

Instructional Designer, Data Analyst & Digital Marketing

Apr 2023 – Jul 2025

Instituto Nacional de Formación Política (INFP)

- Increased email marketing open rate by 275% (from 8% to 30%) through audience segmentation and improved copy, with a data-driven strategy using Mailchimp.
- Increased training-program completion rate by 30% by redesigning the participant experience.
- Managed and analyzed a database of over 200,000 contacts: open, enrollment, engagement, and completion metrics to inform decisions.
- Converted instructional scripts into courses on Rise 360, Thinkific, and Storyline; developed infographics, videos, storytelling, gamification, and interactive materials (Genially, Canva, Powtoon, Nearpod, Quizizz, Mentimeter).

- Facilitated in-territory training using popular-education methodologies for legislators, territorial coordinators, communities, and participants with no prior technology background.
- Coordinated virtual programs with universities across Latin America and Europe, and international events: logistics, technical room management (Zoom, Meet), speaker support, and simultaneous interpretation.
- Designed and maintained educational and enrollment microsites; managed the Conciencias publications page and improved institutional SEO and digital storytelling.

Neuropsychologist & Educational Consultant

2020 – Present

Independent practice · Professional license (cédula) 11054476

- Neuropsychological assessment and design of individualized intervention and learning strategies.
- Synthesis of complex clinical information into actionable recommendations for patients, families, and schools; creation of psychoeducational materials.

STEM Educator & Facilitator

2022 – 2023

Patrones Hermosos – MIT Latin Code

- Taught computational thinking, web design (HTML, CSS, and JavaScript), and Design Thinking to women aged 18–30 across three cohorts (~50 participants total); personalized mentoring on tech projects using GitHub.
- Supported projects linked to the UN Sustainable Development Goals and contributed to course curriculum design.

Mentor

2022 – 2023

Bécalas Conectadas Program

- Individual and group mentoring across 5 groups of 8–10 upper-secondary and college-age participants: soft skills for technology, emotional management, and life planning; training certified by the International Youth Foundation.

Clinical Neuropsychology, Research & Community Education

2013 – 2023

Instituto Nacional de Neurología y Neurocirugía, ISSSTE, UNAM, SSA, CETI-Katz

- Designed intervention and rehabilitation programs for children (from age 4), adolescents, and adults with neurodivergences, with individualized plans by cognitive domain (attention, language, executive function, memory).
- Clinical research on Parkinson's disease and language: data collection and analysis, database construction, and co-authorship of a peer-reviewed publication.
- Administration of neuropsychological assessments, facilitation of workshops for patients, families, and professionals, and work with multidisciplinary teams.

COMMUNITY & LEADERSHIP

- Women Techmakers Ambassador (Google), 2026 — official ambassador, recently joined.
- STEM Educator and Facilitator at Patrones Hermosos – MIT Latin Code, 2022–2023 (see Professional Experience).
- Mentor, Bécalas Conectadas Program, 2022–2023 (see Professional Experience).

FEATURED PROJECTS

- Human Rights Training Model Update Proposal (CNDH): full design and delivery of a curriculum proposal for the national training platform.
- Aula Micropolítica — navigable prototype of an educational platform on micropolitics, designed and deployed with AI-assisted tools (v0-aulamicropolitica.vercel.app).
- Cognitive Observatory — experimental metaportfolio in progress; currently, the interactive hero (cognitive-observatory.vercel.app).
- Web design with a neuropsychological and UX focus for mental-health professionals.

PUBLICATIONS

Verbal production and Parkinson's disease. Dementia & Neuropsychologia. DOI: 10.1590/1980-5764-DN-2022-0027

EDUCATION

M.A. in Clinical Neuropsychology: Universidad Nacional Autónoma de México (UNAM), 2018–2020 (coursework complete; thesis in progress)

B.A. in Psychology: UNAM, 2012–2015 · Professional license (cédula) 11054476

CERTIFICATIONS & ADDITIONAL TRAINING

- Google Data Analytics Certificate – Google / Inroads
 - Data Science Diploma – Bedu / Santander
 - Agile Roles Diploma – Scrum Master
 - IBM Data Science Professional Certificate and IBM Generative AI Engineering – Coursera (in progress, 2026)
- ADKAR change-management methodology training
 - Design Thinking training
 - AI applied to data science
 - Digital marketing and e-commerce

TOOLS & LANGUAGES

Training & LMS: Rise 360, Storyline, Thinkific, Brightspace, Genially, Canva, Powtoon, Nearpod, Quizizz, Mentimeter

Data: Excel, Tableau, Python, SQL, GitHub · **Generative AI:** ChatGPT, Claude, Gemini, Perplexity

Communication & marketing: Mailchimp, digital forms, microsites, SEO, Zoom, Google Meet

Languages: Native Spanish · English B2 (TOEFL ITP 590)
